The Junior Streamline

People in the days of Queen Elizabeth liked to watch the swans on the Thames. People next week in the New York Zoological Gardens will still like to watch the swans. That is because the swans are functionally designed. Most of the forms in Nature have lasting beauty because they are functional. Many of the forms designed by man are short-lived because they are created without regard for use. In the Junior Streamline suite, Leopold designers have created forms that follow function. As a result, the lines of the Junior Streamline will continue to be restful after years of daily use.

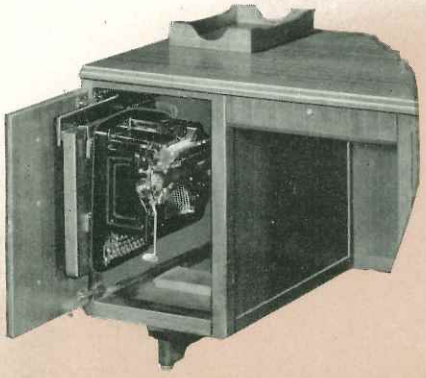
ROUNDED CORNERS
All corners and edges of Leopold desks are softly rounded . . . more appealing to the eye and to the touch . . . less likely to mar.



TYPEWRITER MECHANISM
The typewriter is brought out or stowed away with one-hand ease. A four-point locking device eliminates vibration when typing.

SECRETARIAL DESK
Typewriter mechanism is available in either left or right pedestal.

CABINETS

These cabinets — JSL-34-C, left; JSL-20-C, right — offer convenient storage space alongside the desk or in other office locations. Both are desk height and 17 inches deep; 34 and 19 inches long, respectively.

TYPEWRITER DESK

The typewriter platform is vibrationless in use . . . counterbalanced for easy one-hand operation.
